

Web Design

Type

Technical Event

Description

If you think of web pages as something more than content shown on two-dimensional screens and want to showcase your web design skills, then this is the event for you. Inspect elements, tinker the individual components. If you feel that you can create a web page from a user's perspective, this event is for you! A raw HTML fan page will be given to participants, and then one has to choose a page and add a CSS file to design the web page.

Rules

1. One can reorganise the content as they seem fit but can't remove or add HTML from their side .
2. It is an Individual event.
3. One can choose any one Artist they like from the choices provided **in the released problem statement**.
4. A github repo should be maintained and that will be used for final evaluation .
5. The github repo should be well organised and maintained as it will be considered for evaluation.
6. Marking scheme
 - a. Web design = 45 marks
 - b. Responsiveness = 25 marks
 - c. Animations used = 20 marks
 - d. Github pushes = 10 marks
7. Plagiarism from other participants will not be tolerated and the participant will be disqualified.

Entry Fee - **Free**
